

Bee: color and cut out; fold in half and staple at base of wings where marked

Kazoo: cut generous piece of wax paper; rubber band to end of toilet paper tube smoothing out as many wrinkles as possible; optional: hole punch as far as you can reach in at opposite end (it can work without the hole); slide bee over kazoo and sing "doh" into kazoo to create buzzing sound

Note: may take a few tries to get the kazoo to work— try smoothing the wax paper, doubling the rubber band, or singing louder or at a different angle
