

### Fiery Furnace craft

(May lesson 2)

#### Ahead of time:

Copy craft on to cardstock. Cut out (or have scissors and have them cut out – older kids can cut out for younger ones). Have crayons or markers and magnets (the kind where you peel off the back and they self-stick).

#### During class:

Have the kids color the craft, cut it out (if you haven't already), and then stick a magnet piece to the back so that they can put it on their fridge.
