

# Dove craft instructions (this is way too detailed– oh well)

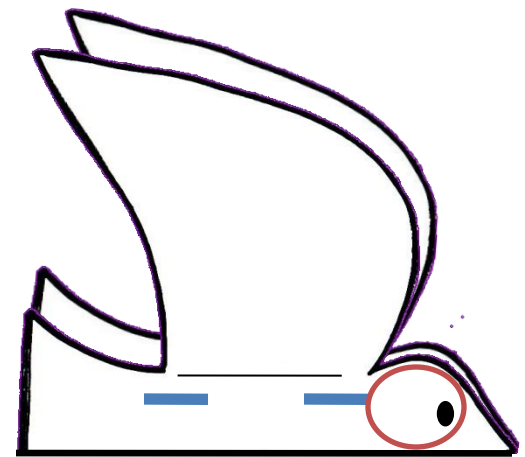

- 1) Copy the master onto cardstock (cardstock and instructions for printing on it are in the Teacher Workroom)
- 2) Color the dove, both sides (or not, doves are white, at least sometimes)
- 3) Cut out the dove on the bold-faced line.
- 4) Fold dove in half on middle line (picture 1).
- 5) Fold wings down on either side using guide lines (picture 2).
- 6) Staple in 2 spots (blue lines in picture 3).
- 7) If you want it to be able to fly (sort of), put a penny inside the head (red circle in picture 3) and tape it shut. Fold the wings back down perpendicular to the body like in the 2<sup>nd</sup> picture before trying to make it glide. Also, if you hold the body and move your hand up and down, the wings will flap a bit.
